To our customers

23.02.2021

Declaration to Regulation (EC) No. 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

Declaration for conflictminerals „Dodd-Frank-Act“

Dear Sir or Madam,

we hereby declare, that the articles delivered to your company are compliant with the respective current RoHS guideline 2011/65 (EU) and the delegated guideline (EU)2015/863 (RoHS III) and that the limit values specified therein are being complied to.

Furthermore, we declare that the delivered products according to regulation (EC) No. 1907/2006 (REACH) do not contain any substances from the respective current version of the European SVHC candidate list above the concentration limit value – unless expressly requested by your company (drawing). We would like to point out that free-cutting steel may contain up to 0.35 % lead. Products made of this material are only supplied by us if this is required in the customer documents.

We confirm also that, according to our suppliers, no „conflict minerals“ as defined by the Dodd-Frank-Act, such as tantalum, tin, tungsten and gold, are contained in our products.

Best regards

Freund Drehtechnik GmbH
